

## A call for action to protect SRHR and family planning

Yesterday, the Coalition alerted you to a recent development: a new <u>Global Financing</u> <u>Facility</u> (GFF) which stands to impact significantly the way family planning is funded. In support of <u>Every Woman Every Child</u>, the GFF seeks to mobilize support for developing countries' plans to accelerate progress on the Millennium Development Goals; the fund seeks to end preventable maternal, newborn, and child deaths by 2030. The GFF is being developed in coordination with many stakeholders, including countries, UN agencies, civil society organizations, and more.

The Coalition has undertaken to serve the RH supplies community by collating and disseminating family planning-related developments around the GFF. Yesterday, we alerted you to a consultative process with an imminent deadline into which the community may provide feedback. Here, we send out a call from the Advocacy and Accountability Working Group (A&A WG) to the RH community to <u>make their voices heard</u> and ensure that sexual and reproductive health and rights (SRHR) and family planning do not become sidelined.

Read the A&A WG's position paper <u>here</u>. Sign the petition <u>here</u>.
