

Reproductive Health
SUPPLIES COALITION

PROGRESS REPORT

Strategic Plan for the Next Decade

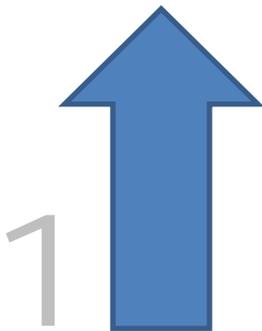

Why revisit the 2007 Strategic Plan?

- The 2012 External Evaluation recommended the Coalition update its original 2007 Strategic Plan.
- The Coalition today is a very different institution from what it was in 2007.
- In Paris, work began to take stock, identify levers of change, and make sure these levers continue to drive initiatives in the future.
- Strategic planning process has taken into account the rapidly evolving landscape for FP and RH landscape.

- Tease out the supplies angle
- Recognize what we can do (based on LOCs)
- **Formulated relevant goals**
- **Defined success and what it will take to do the job**
- **Theory of change**

Levers of change

Our **neutrality** provides a space for technical collaboration and problem-solving.

Our **convening power** enables us to draw from a global network of stakeholders

Our **brain trust** of RH experts has served to incubate new ideas and solve problems.

Our ability to **broker partnerships** helps in influencing policies and guiding global direction.

Our **flexibility** to confront new issues as they arise

Our **good name** and successful track record allows us to heighten awareness and visibility of critical issues

The Coalition's Vision

2007

All people in LMI countries are able to access and use affordable, high-quality supplies, including a broad choice of contraceptives, to ensure their better reproductive health.

2013

All people are able to access and use affordable and quality supplies, including a broad choice of contraceptive **methods**, needed to ensure their better **sexual** and reproductive health.

The Coalition's Mission

Our purpose is to bring together a diversity of partners and mobilize their collective strengths to increase access to a full range of affordable, quality SRH supplies in low- and middle-income countries.

Our Guiding Principles:

- We are committed to add value to the activities of individual member-organizations.
- We are committed to greater country ownership and leadership in meeting RH supply needs.
- We believe that sexual and reproductive health and rights are fundamental to ensuring equitable access and use of RH supplies, including informed choice of contraceptive methods.
- We believe that access to supplies is a necessary but not sufficient condition to achieve better reproductive health.

Our vision is predicated on the ability of women and men ...

- To have **quality** supplies they *know* are both safe and effective.
- To have **equitable** access to RH supplies, irrespective of their financial well-being.
- To have a range of contraceptive and other RH options from which to **choose**.
- To **avail** themselves of a safe, affordable choice of supplies needed to meet their needs

Strategic Goal 1: EQUITY

To reduce the financial and product-related barriers that marginalize populations from accessing the supplies they need to ensure their sexual and reproductive health.

Pathway:

- Better understanding of the **total market**
- Identification of **disadvantaged** populations
- Appreciation by **policymakers** of the benefits to be derived from ensuring access for all.

Strategic Goal 2: QUALITY

To ensure that women and men are able to obtain RH supplies that they can believe are safe and effective by virtue of meeting agreed quality criteria.

Pathway:

- Building demand for quality products by **consumers** and the broader community
- Influencing **national policies** and regulations that favor the provision of quality assured products.

Strategic Goal 3: CHOICE

To ensure women and men can choose from wider range of contraceptive and other RH supply options currently available in the global marketplace.

Pathway:

- Global and national commitments to ensure the **availability of a full range of products**
- Consensus around a **definition** of choice
- **Global and national policies** in place to support method choice
- **Increased financing** to support choice

Strategic Goal 4: AVAILABILITY

To ensure the availability of RH products and supplies from the manufacturers through the supply systems to point-of-access

Pathway:

- Stable global system, including a **full product pipeline**
- High-performing and efficient national **supply systems**
- **Policy environment** that is conducive to efficient supply chains.

What do the pathways have in common?

- Forge **national commitments** leading to supportive **policies**, regulations, appropriate decisions.
- Strengthen **international commitments** leading to increased **resources**, supportive policies, technical support.
- Fill the **product pipeline** with quality products to choose from.
- Understand the **total market** with a view towards appropriate, effective **resource allocation**.
- Educate and engage **consumers** to vote with their pocketbooks, feet, and ballots.

VISION

"ALL PEOPLE ARE ABLE TO ACCESS AND USE AFFORDABLE AND QUALITY SUPPLIES, INCLUDING A BROAD CHOICE OF CONTRACEPTIVE METHODS NEEDED TO ENSURE THEIR BETTER SEXUAL AND REPRODUCTIVE HEALTH."

STRATEGIC PILLARS

EQUITY

QUALITY

CHOICE

AVAILABILITY

STRATEGIC GOAL (CONTRIBUTION OF RHSC)

Remove financial & product barriers that hinder access to RH supplies

People can obtain RH supplies they know are safe and effective

People are better able to choose from a range of RH supply options currently available in global market

RH products are available throughout the supply chain, from manufacturers to points of access

SIGN OF SUCCESS

Right products in the hands of those who need them

Supply of quality RH products increased and being used

Contraceptive method mix reflects what people want/need

Greater equilibrium between supply and demand (no stockouts, no overstock)

PREREQUISITES

Remove cost barriers that hinder choice and availability

Quality-supportive policies implemented by committed govts.

Demand built for quality products among consumers

Existence of national policy and legal frameworks that support choice

High performing national systems & supply chains

Well functioning coordinated global systems that offer supply chain visibility and means to redress disruptions

WHAT CAN RHSC DO ABOUT IT?

Local market shaping efforts

Consumers given means to demand quality and know difference

Understand total market to foster more effective and just allocation of resources

Increase national/government commitment to all strategic pillars

Strengthen donor/international commitment to all strategic pillars

Fill product pipeline

Technical support to strengthen key supply chain components

Making the business case for strategic pillars

Communicate new knowledge; international advocacy

Enhance market visibility

Reduce market barriers

Incentivise production by manufacturers

Human resources development
