Solving challenges through a “Supplies Lens”
Objectives

**Supplies lens**
What does it mean to apply a “supplies lens” when developing proposals for the Innovation Fund?

**Themes**
What are some of the critical themes that we will prioritize during the upcoming round of the Innovation Fund?
What do we mean by “supplies lens”?
What do we mean by “supplies lens”? 

Right product, right price, right time
What do we mean by “supplies lens”?

Product positioning, product choice, product movement
What do we mean by “supplies lens”?

Systemic factors that make choice, product flow, and availability possible.
A “supplies lens” focusses on the interface between the product and the entire “system”

For many IMs, there is a close connection between the product and the wider distribution system.

For IMs that address the RH needs of key population segments, it is harder to segment the product from the user.
Conflating strategic relevance with interest in a population segment
Looking to our Strategic Indicators

- Neutrality, converging power
- Partnerships formed by the Coalition members that allow member organizations to assemble to share knowledge, raise awareness, address sensitive issue areas, and/or build consensus around a common course of action.
- Enabling partnerships, build trust
- Collaborative efforts by Coalition members across different sectors to enhance high priority supply chain
- Flexibility that derives from the Coalition’s broad mandate base
- Time-sensitive issues that the Secretariat has taken on in the past for action.
- Research focus
- Close ties with members, as a result of the Coalition, by staff of the Secretariat and executive staff.
- Intermediary of engagement, as in the Coalition, as a result of the Secretariat.
- Initiatives undertaken with Coalition a support that builds health workforce capacity and supply chain management.
- Tools: methodologies approaches developed, improved, and used for estimating global demand of health products, including forecasts, and/or coordinating procurement decisions more effectively.
- Policy: guidance and/or national strategic plans to improve supply chain management, as a result of Coalition engagements.

Quality
- Increase the supply of high-quality, low-cost products
- Increase the demand for high-quality, low-cost products
- Increase the demand for high-quality, low-cost products
- Support the establishment and implementation of quality supportive policies at the country level
- Support for strategy (national policy, guidelines) and in strategic plans to promote quality-assured products and medicines

Nexus
- Where national can meet the principle of equity policy rational actions
- Contributions to policy, guidelines, sectoral strategies to support more equitable access to medicines
- Increases the demand for medicines and linkages to market
- Integrate initiatives with other initiatives to raise awareness and impact the body of consumers and the intermediaries.
- Coalition-supported local models and other financing innovations that create a new access to medicines
- Overcome barriers that limit access to the products people need (products)
- Coalition-supported initiatives to introduce at country level the innovations that meet the needs of vulnerable populations.

Industry
- Committee on the role of “industry” in planning and decision-making
- Contributing to the transformation of “industry” to provide support to advance commitments to change.
- Industry’s role: a global action to address the industry context.
- Coalition-supported initiatives to collect and disseminate product-related information that manufacturers or producers can use to make decisions about investing in the range of medicines available (products).
