# USAID | DELIVER PROJECT

FROM THE AMERICAN PEOPLE

## BACKGROUND

- CPDS is a mechanism initiated by the MOH that pools resources from different funding partners in FP programs and creates a common fund for the procurement and distribution of health commodities.
- For contraceptives, implementation of this mechanism is administered by two committees, and is appointed and chaired by the MOH Logistics and Quantification Committee
- Data are collected and analyzed through routine assessments conducted by the USAID | DELIVER PROJECT and outcomes are used for SC management of contraceptives.

## FUNDING PROCESS UNDER THE CPDS MECHANISM

- Partners in FP programs put their efforts together in a common fund for contraceptives by request of the MOH
- In Rwanda, the main funders in CPDS for Contraceptives are:
  - **MOH:** procurement through CMS/MPPD
  - **USAID:** procurement through USAID | DELIVER PROJECT
  - **UNFPA:** procure through its own means, stored by the CMS
  - **GF:** procurement through the CMS

## CHALLENGES AND NEXT STEPS FOR THE CPDS

### Challenges:

- Lack of flexibility to verify measurements of SC performance indicators
- Lack of certainty regarding data accuracy due to manual system of collection
- Unjustified decrease of reporting rates for some FP commodities

### Planned Steps to Improve CPDS:

- Harmonize the process across disease areas and develop of SOPs
- Organize and conduct FP data quality assessments
