

# New and underused reproductive health technologies

<b>Goal</b>	to help improve choice of reproductive health technologies
<b>Purpose</b>	contribute to country level efforts to achieve MDG 5
<b>Approach</b>	<ul style="list-style-type: none"><li>• Within RHSC, broaden the discussion within the Coalition of these effective technologies that are not well integrated into the public or commercial sectors globally</li><li>• Collaborate with the WGs to identify specific initiatives that contribute to improved choice at national level</li></ul>
<b>Activities</b>	<ul style="list-style-type: none"><li>• Technical briefs</li><li>• Identify new technologies for inclusion in RHSC work</li><li>• Develop tools for forecasting the demand</li><li>• Ensure coherence between RHSC work and WHO on NURHTs</li><li>• Share guidance on introduction strategies</li></ul>

# What are the technologies?

Contraceptive Implants

CycleBeads®

Diaphragm

Emergency Contraceptive Pills

Female Condom

HPV Vaccines

Levonorgestrel Intrauterine System

Magnesium Sulfate

Manual Vacuum Aspiration

Medical Abortion

Misoprostol for Maternal Health

Oxytocin

Progesterone Vaginal Ring

# Workstreams: WGs, Forums and Task Force

## MDAWG

1. Market shaping/dynamics
2. Supplies Information Database (SID)
3. QuRHM (Quality of RH Medicines)

## SSWG

1. AccessRH / RHI
2. NUMs Guide
3. CARhs (Coord. Assistance RHS)
4. LAPTOP (Learning Prof. Train. Ops)
