Why Menstrual Restrictions?

**Poor Mindset, Ignorance and Tradition:** NOT considered as everyone’s business among donors, human right activists, activists, teachers, health workers, male, etc.

**Stigma, Gender Discrimination and Masculinity:** The menstrual blood considered as bad luck, impure, polluted

**Poverty:** women are economically dependent, products are expensive, which is not the priority in the family, no government subsides

**Unavailability of Sanitary Products:** limited choice, expensive, no financing opportunities

**Unavailability of toilets with water supply:** Only 37% toilet coverage (NPC, 2015)

**Policy Attention:** Merely absence, no priority, culture of silence
