

Strong SRHR/FP Voice in PNMCH Consultation Report

Consultations on updating the Global Strategy for Women’s, Children’s and Adolescent’s health show a strong SRHR/FP voice. Thanks to all of you who took the effort to sign the position paper, organize consultations and submit feedback to the PNMCH process, SRHR is the only specific theme that was called out in the 9 points that highlight the findings of the consultation.

“Strong interest in clarifying how the operation model of the GFF will advance and champion a rights-based approach and in particular, how it will promote, protect and expand access to sexual and reproductive health and rights services (SRHRH).”

Most of the specific concerns highlighted by the community in the position paper and feedback found their way into the report. The Coalition, the GFF Advisory Group and the A&A Working Group GFF workstream will now be putting their shoulder to the wheel to support country partners to contribute to the process as national consultations take place.

The summary of findings and the full report can be found [here](#).
