She Makes Her Safe Choice

Expanding global access to safe abortion
Introduction to DKT WomanCare

♀ WomanCare Global (WCG) part of DKT International since 2017

♀ DKT WomanCare: part of DKT family, but different from DKT country programs

♀ Key differences:

• Manufacturer of Ipas Manual Vacuum Aspirators (MVA)

• Work in both developed and developing markets
Big Ideas for She Makes Her Safe Choice

♀ Convert unsafe abortions to safe abortions everywhere
   • Increase registrations
   • Enhance local expertise
   • Increase no. of providers offering safe services

♀ Promote contraception to avoid unplanned pregnancies
   • Register, market and distribute contraceptives
Increasing Local Expertise

Locally contextualize abortion through a woman-focused, harm-reduction lens. Emphasis on fighting maternal mortality and saving lives.

Other Examples: Menstrual Regulation, Post-Abortion Care
Increase Reach of the MVA

**Recommendation 1:** “Vacuum aspiration is the recommended technique of surgical abortion…dilatation and sharp curettage (D&C), if still practiced, should be replaced by vacuum aspiration” (Annex 5, pg. 123).

**Objectives for DKT WomanCare**
- Convince providers to adopt/convert
- Use other indications to expand use/reach of MVA

Abstract
Objective: To validate recommended reprocessing methods for Ipas manual vacuum aspiration (MVA) devices.
Methods: All recommended reprocessing methods for Ipas MVA devices were tested.

- Safe / cost-effective
- Reusable
- No electricity needed / requires limited space
- Portable / quiet
- Lower incidence of side effects and complications
- Feasible in outpatient and emergency settings
- 8 different color-coded cannulae (sizes 4mm - 12mm) with integrated wing-tip base

Explain the procedure to the client and encourage questions.
