Interview and knowledge test located

at: <http://www.mchip.net/sites/default/files/QoC%20Interview%20Knowledge%20Test.pdf>

Purpose

This is part of the MCHIP multi-country quality of care study. The first tool collects information from health workers on: clinical qualifications and training and experience providing ANC, L&D, and post-natal care. The second tool is composed of questions that test the provider's knowledge of how to identify, manage, and treat common maternal and newborn health complications, including obstructed labor, PPH, and sepsis.

Audience

This tool may be used at the facility level.
