

Information Sheet

Ensuring Access to PE/E Primary, Secondary, and Tertiary Prevention Interventions

Developer

Maternal and Child Health Integrated Program (MCHIP)

How to access the tool

<http://www.k4health.org/toolkits/preeclampsia-eclampsia/ensuring-access-pee-primary>

Purpose

This document is based on the POPPHI planning tool on AMTSL to guide countries to study the potential pre-eclampsia/eclampsia (PE/E) interventions (primary, secondary, and tertiary) and then decide on which interventions to adopt. It covers the following critical elements that must be in place to ensure access to the interventions: policy, provider, logistics (drugs and supplies), and monitoring and evaluation.

Audience

This tool may be used by program managers at the health facility level.

Language

English

Keywords

policy, use, implementation guide, magnesium sulfate, PE/E
