

Session 12: Future Enhancements for the WHO Prequalification Programme

Aspirations

- Strengthening quality assurance (QA) at sub-tier levels within the supply chain
- Monitoring external perceptions and expectations of prequalified suppliers
- Adding additional suppliers

Supply Chain Quality Assurance

Flow of QA:

- Assess raw material suppliers
- Subcontract manufacturing requirements
- Subcontract packaging

Addressing External Expectations of Prequalified Suppliers

Corporate social responsibility:

- Environmentally responsible
- Fair labor practices
- Community engagement
- Vigilance regarding product safety

Expanding the Supplier Base

- Working to encourage the development of additional factories
- What are the issues?

Open Discussion

- Question: As users of the WHO Prequalification Programme, what future enhancements would you like to see?
